SONICOR INC. ANNOUNCES THE LAUNCH OF THE NEW TRANS-CLEAN SERIES, AUTOMATED PARTS HANDLING - PROCESS CONTROL SYSTEM FOR MULTI-STAGED PARTS CLEANING LINES

FOR IMMEDIATE RELEASE:

West Babylon, NY – Sonicor Incorporated, a leading manufacturer of ultrasonic cleaning and vapor degreasing systems, is marking its 50th anniversary with the introduction of the next generation of Sonicor automated parts handling systems, for use with multi-stage wet process lines. These new systems incorporate the long-established performance and reliability of the Sonicor RCT automation system, with the programming ease and flexibility of an Allen-Bradley PLC. The new Trans-Clean operator interface terminal utilizes a color touch-screen display, providing advanced, simplified control and monitoring of multiple process variables.

Since the introduction of the first Sonicor automated parts handling system, in the 1970s, Sonicor automation systems have been installed with hundreds of Sonicor parts cleaning and degreasing lines, and retro-fitted onto cleaning, degreasing, passivating and plating lines of other manufacturers.

This new Sonicor technology will be featured on all systems shipped after October 1st, 2015

Dependable ULTRASONIC equipment for precision cleaning
