

Equipment Specification

CU-6041410-10 Mobile Ultrasonic Cleaning Console

Tank I.D	14"x 10"x 12" deep
Capacity7 gallons
Tank Construction.....	Welded 304 stainless steel
Ultrasonic Transducers.....	(12) High efficiency piezoelectric type
Ultrasonic Generator.....	600 Watt, 40Khz, Sweep frequency
Heat.....	750 watts, Thermostat Controlled
Temperature Range.....	Ambient – 180°F
Console Cabinet.....	All stainless steel
Casters (optional)	Four (4) swivel type
Power Requirement	120 volts, 50/60Hz, 15 Amps

Sonicor Dependability

The Sonicor "CU" series ultrasonic cleaning consoles offer the performance and reliability of Sonicor "BandScanner" series sweep frequency ultrasonics, in a rugged, all stainless steel console cabinet. With the durability of the stainless steel cabinetry and the mobility provided by the optional swivel casters, these units are ideally suited to provide continuous effective ultrasonic cleaning, even in the harshest industrial environment. The Sonicor "CU" console is a excellent, cost-effective, environmentally safe alternative to conventional parts cleaning systems that rely on the use of hazardous chemicals. They require little or no specialized operator training, and no special utilities for installation.
